

Water Innovation Hackathon Participant Guidelines

Objective

Participants must build a functional Proof of Concept (PoC) that demonstrates technical feasibility within a limited timeframe. Focus on core functionality and real-world impact rather than polished design.

Expected Deliverables

- 1 Working Prototype (App, Website, or Model)
- 2 Pitch Deck (PDF)
- 3 GitHub Repository with README
- 4 Short Demo Video

Project Structure

- 1 Project Title & Tagline
- 2 Problem Statement
- 3 Proposed Solution
- 4 Value Proposition
- 5 Technical Architecture
- 6 Key Features
- 7 Tech Stack
- 8 Demo & Code Links

Recommended Formats

- 1 Pitch Deck: Problem → Solution → Demo → Impact
- 2 Live Demo: Functional prototype
- 3 Technical README: Setup & execution guide
- 4 Video Demo: Walkthrough of solution

Tips for Success

- 1 Define clear success criteria
- 2 Use real-world datasets
- 3 Focus on 1–2 key features

- 4 Include future scope

Submission Requirements

- 1 Project Drive link with all files
- 2 Project description (max 100 words)
- 3 Selected track and tech stack
- 4 Pitch deck (PDF)
- 5 Demo video (max 5 minutes)
- 6 Live demo link (if available)

Submission Rules

- 1 Submit to one main track only
- 2 Optional: one bounty submission
- 3 Submit at least 1 hour before deadline
- 4 Late submissions will not be accepted

Final Note

Focus on solving real-world water challenges such as conservation, flood management, smart irrigation, and water quality monitoring. Build impactful and scalable solutions.
